Census File Number

**Item 17. CONSUMPTION OF SELECTED MATERIALS DURING 1997**

**INSTRUCTIONS**

**1. General** – The materials, parts, and supplies listed below are those commonly consumed in the manufacture, processing, or assembly of the products listed in item 18B. Please review the entire list and report separately each item consumed. Leave blank if you do not consume the item. If you use materials, parts, and supplies which are not listed, describe and report them in the "Cost of all other materials . . ." line at the end of this section. If you consumed less than \$25,000 of a listed material, include the value with "Cost of all other materials . . .," Census material code 970099 8.

Report materials, parts, and supplies purchased, transferred from other plants of your company, or withdrawn from inventory.

If quantities are requested, please use the unit of measure specified.

If the information as requested cannot be taken directly from your book records, REASONABLE ESTIMATES ARE ACCEPTABLE.

**2. Valuation of Materials Consumed** – The value of the materials, etc., consumed should be based on the delivered cost; i.e., the amount paid or payable after discounts and including freight and other direct charges incurred in acquiring the materials.

Materials received from other plants within your company should be reported at their full economic value (the value assigned by the shipping plant, plus the cost of freight and other handling charges).

If purchases or transfers do not differ significantly from the amounts actually put into production, you may report the cost of purchases or transfers. However, if consumption differs significantly from the amounts purchased or transferred, these amounts should be adjusted for changes in the materials and supplies inventories by adding the beginning inventory to the amount purchased or transferred and subtracting ending inventory.

INFORMATION COPY  
DO NOT USE TO REPORT

**3. Contract Work** – Include as materials consumed those you purchased for use by others making products for you under contract. No amount paid to the companies doing the contract work should be reported in item 10, line e, and should include freight in and out. On the other hand, materials owned by others but used at this establishment in making products for others under contract or on commission should be excluded.

**4. Resales** – Cost for products bought and sold or transferred from other establishments of your company and sold without further manufacture, processing, or assembly should be reported in item 10, line b, not in item 17 below. The value of these products shipped by this establishment should be reported in item 18B under Census product code 99989 00 6, "Resales."

**Item 18B. PRODUCTS AND SERVICES OF THIS ESTABLISHMENT DURING 1997**

**INSTRUCTIONS**

**1. General** – The manufactured products and services listed below are generally made in your industry. If you make products that are not listed, describe and report them in the "All other products made in this establishment" section at the end of item 18B. PLEASE DO NOT COMBINE PRODUCT LINES.

If quantities are requested, please use the unit of measure specified.

If the information as requested cannot be taken directly from your book records, REASONABLE ESTIMATES ARE ACCEPTABLE.

**2. Valuation of Products** – Report the value of the products shipped and services performed at the net selling value, f.o.b. plant to the customer; i.e., after discounts and allowances, and exclusive of freight charges and excise taxes.

If you transfer products to other establishments within your company, you should assign the full economic value to the transferred products; i.e., include all direct costs of production and a reasonable proportion of all other costs and profits.

**3. Contract Work** – Report products made by others for you from your materials on the specific lines as if they were made in this establishment. On the other hand, do not report on the specific product lines products that you made from materials owned by others. Report only the amount that you received for "commission or contract receipts" under Census product code 93000 00 8.

**4. Resales** – Do not report on the specific product lines those PRODUCTS BOUGHT AND SOLD OR TRANSFERRED FROM OTHER ESTABLISHMENTS OF YOUR COMPANY AND SOLD WITHOUT FURTHER MANUFACTURE. Report only a value under Census product code 99989 00 6, "Resales."

**5. Detailed Data Reported Elsewhere** – Items denoted by an asterisk (\*) require totals for groups of products covered in the more frequent Current Industrial Reports(CIR). If you report on the CIR forms, the sum of the detailed CIR products should equal the total reported on this census form.

**NOTE:** Only CIR totals are requested; do not duplicate detail reported on the CIR.

**Section I – PULP MILL OPERATION**

**Pulp Mill Activities** – Integrated operations consisting of pulp mills and primary paper and board mills at the same physical location need file only one report (MC-2601) for both activities.

**Column (D-1) – Quantity Produced for All Purposes** – Report amount of pulp and other specified products, lines 1–13, made in this establishment during 1997 whether sold, transferred, added to inventory, or used in further processing.

**Columns (D-2) and (E) – Total Shipments (Market) and Interplant Transfers** – Report on lines 1–15, quantity and selling value, f.o.b. plant, of products made in this establishment which were physically shipped from this establishment during 1997.

Exclude transfers of woodpulp to your paper or board mill at this location. Include products transferred to other establishments of your company (such as other manufacturing plants or separate sales branches). Include products shipped on consignment, whether or not sold at the end of the year. Deduct returned goods.

Please do not combine product lines.

13		Refined, containing less than 90 percent free fatty acids (including tall oil resins other than tall oil rosin) (corresponds to item code 8700 as reported in Current Industrial Report M20N, Animal and Vegetable Oils, for 1997)*	28610 25 1					
14	TALL OIL FATTY ACIDS	Fatty acids (containing less than 2 percent rosin acids and more than 95 percent fatty acids)	28992 92 3					
15		Fatty acids (containing 2 percent or more rosin acids)	28992 94 9					

**Section II – PAPER AND BOARD MILL OPERATIONS**

**Paper and Board Mill Activities** – Paper and board mills having integrated converting facilities at the same physical location need file only one report (MC-2601) for all activities. Integrated activities were previously reported on separate forms.

The division between the primary product of the paper machine and the secondary or converted product is not always precise. Generally, primary manufacture ends when the product of the machine has been "finished" and is ready for shipment. In finishing, some incidental operations may be performed which, if performed in a converting plant, would be considered part of the converting operation.

When such operations are limited and incidental in character and do not result in substantially altering the character of the sheet, they may be considered a part of primary manufacture. Primary manufacture includes cutting, reeling, trimming, sorting, or supercalendering operations directly behind the machine.

All processes, such as off-machine coating of paper, laminating, die-cutting, waxing, shaping into envelopes, bags, boxes, etc., are, however, considered converting operations and should be reported in section III of item 18B.

**Column (D-1) – Quantity Produced for All Purposes** – Report amount of tissue paper and other machine-creped paper, lines 51–58, made in this establishment during 1997 whether sold, transferred, added to inventory, or used in your tissue converting operation at this location.

**Column (D-2) and (E) – Total Shipments (Market) and Interplant Transfers** – Report selling value, f.o.b. plant, of all products made in this establishment which were physically shipped from this establishment during 1997. Report quantity on a finished basis (e.g., less machine and finishing room waste). Exclude transfers of paper and board to your converting facility at this location. Include products shipped on consignment, whether or not sold at the end of the year. Deduct returned goods.

Report quantities in the unit of measure specified. Also, report quantity on a finished basis (e.g., less machine and finishing room waste).

Please do not combine product lines.
