Item 17. CONSUMPTION OF SELECTED MATERIALS DURING 1997

INSTRUCTIONS

1. General – The materials, parts, and supplies listed below are those commonly consumed in the manufacture, processing, or assembly of the products listed in item 18B. Please review the entire list and report separately each item consumed. Leave blank if you do not consume the item. If you use materials, parts, and supplies which are not listed, describe and report them in the "Cost of all other materials . . ." line at the end of this section. If you consumed less than \$25,000 of a listed material, include the value with "Cost of all other materials . . .," Census material code 970099 8.

Report materials, parts, and supplies purchased transferred from other plants of your company or withdrawn from inventory.

If quantities are requested, please use the unit of measure specified.

If the information as requested cannot be taken directly from your book records, REASONABLE ESTIMATES ARE ACCEPTABLE.

2. Valuation of Materials Consumed – The value of the materials, etc., consumed should be based on the delivered cost; i.e., the amount paid or payable after discounts and including freight and other direct charges incurred in acquiring the materials.

Materials received from other plants within your company should be reported at their full economic value

(the value assigned by the shipping plant, plus the cost of freight and other handling charges).

If purchases or transfers do not differ significantly from the amounts actually put into production, you may report the cost of purchases or transfers. However, if consumption differs significantly from the amounts purchased or transferred, these amounts should be adjusted for changes in the materials and supplies inventories by adding the beginning inventory to the amount purchased or transferred and subtracting ending inventory.

3. Contract Work – Include all materials consumed that you purchased or used by others making products for you under contract. Amounts paid to the companies doing the contract work should be reported in item 10, line e, and should include freight in and out. On the other hand, materials owned by others but used at this establishment in making products for others under contract or on commission should be excluded.

4. Resales – Cost for products bought and sold or transferred from other establishments of your company and sold without further manufacture, processing, or assembly should be reported in item 10, line b, not in item 17 below. The value of these products shipped by this establishment should be reported in item 18B under Census product code 99989 00 6, "Resales."

Item 18B. PRODUCTS AND SERVICES OF THIS ESTABLISHMENT DURING 1997

INSTRUCTIONS

- General – The manufactured products and services listed below are generally made in your industry. If you make products that are not listed, describe and report them in the "All other products made in this establishment" section at the end of item 18B. PLEASE DO NOT COMBINE PRODUCT LINES.
If quantities are requested, please use the unit of measure specified.
If the information as requested cannot be taken directly from your book records, REASONABLE ESTIMATES ARE ACCEPTABLE.
- Valuation of Products – Report the value of the products shipped and services performed at the net selling value, f.o.b. plant to the customer; i.e., after discounts and allowances, and exclusive of freight charges and excise taxes.
If you transfer products to other establishments within your company, you should assign the full economic value to the transferred products; i.e., include all direct costs of production and a reasonable proportion of all other costs and profits.
- Resales – Do not report on the specific product lines those PRODUCTS BOUGHT AND SOLD OR TRANSFERRED FROM OTHER ESTABLISHMENTS OF YOUR COMPANY AND SOLD WITHOUT FURTHER MANUFACTURE. Report only a value under Census product code 99989 00 6, "Resales."
- Note for Printers – This form is designed to provide "general statistics" reported by all industries and to accommodate reporting of all printed products and selected printing activities. Item 18B, which constitutes the bulk of the report form, appears to be rather formidable with respect to the number of products listed; however, each section has been clearly labeled and each product is described to identify the specific type of printing activity. Due to the variety of printing activities performed by establishments in the printing industry, it was not possible for the Census Bureau to know in advance what type of printing activity each establishment is engaged in, and thus have a form designed to cover that specific activity.
- Print Brokering – If your receipts are for arranging to have printing done for others and you do no printing yourself, report on line 211.
- Printing on Apparel and Fabric Articles – Report receipts on lines 143–145.
- Labels – Include set-up box labels; defined as being printed or bordered, generally affixed to the package or product (but not containing the product), primarily for identification and/or instructions. Labels incorporate any or all of the following characteristics: gummed or adhesive coated; die-cut or in rolls or sheets; varnished, waxed, embossed, laminated, or otherwise coated. Report unprinted labels on line 160 or lines 207–209.
- Rolls and Sheets for Packaging – Paper, film, and foil items primarily for product protection, but may be formed into a container by end user. Report printing only by type of press used. Report coating, waxing, or laminating, whether or not printing, on lines 196–203.
- Photocopying – Report receipts on line 210.
- Quick Printing – Commercial printing using either offset equipment that is only capable of printing materials less than 18" X 23", or digital equipment (including ink-jet printers) to print text-type documents. Printing with offset equipment capable of printing materials 18" X 23" or greater should be reported under lithographic printing (lines 27–76). Printing materials other than text-type documents on digital printing equipment should be reported as "digital printing" on line 26. Report quick printing on lines 24 and 25.
- Digital Printing – Commercial printing using digital printing equipment to produce materials other than text-type documents. Printing text-type documents on digital equipment should be reported as "quick printing," on line 25. The use of digital technology as "pre-press" for conventional printing equipment does not constitute digital printing and should be reported based on the type of equipment (lithographic, flexographic, screen, etc.). Report digital printing on line 26.
- Checkbooks – Report receipts on lines 161–166.
- Book Jackets and Covers – Report book jackets printed by offset lithography on line 58; report all other book jackets on the line for "other advertising printing" under the appropriate printing process. Report book covers not used to bind books in this establishment on line 193.
- Manifold Business Forms – Report on lines 167–183. "Unit set forms" includes all carbonless, carbonized, or carbon interleaved forms with an original and one or more copies, with or without a stub. "Label/form combination" is any form which incorporates a label into its construction. "Jumbo roll-feed forms" are continuous forms intended for use in high-speed printers; they go to the end user in a roll.
